+52 720 805 4403 | krva@ciencias.unam.mx | Mexico City, MX | [linkedin.com/in/miguel-carvajal](https://www.linkedin.com/in/miguel-carvajal)

PROFESSIONAL SUMMARY

Senior Cloud & AI Platform Engineer with 10+ years designing and operating enterprise cloud-native infrastructure. Specialized in deploying and operationalizing AI/LLM systems at scale on AWS (Bedrock, EKS). Deep SRE foundation — CI/CD, IaC, incident management, SLO/SLI — applied to both traditional infrastructure and emerging LLMOps reliability.

CORE SKILLS

AI & LLM Platform: AWS Bedrock (Claude, Titan), LangGraph, LangChain, RAG pipelines, MCP (Model Context Protocol), LibreChat, vector databases (FAISS, Chroma), LangSmith

Infrastructure & DevOps: Terraform, Terragrunt, GitLab CI/CD, GitHub Actions, Jenkins, Kubernetes (EKS), Helm, Docker, ArgoCD

Cloud Platforms: AWS (EC2, EKS, RDS, Lambda, CloudFormation, SSM, S3), GCP (Vertex AI, BigQuery, Cloud Storage), Azure, OCI

Security & CDN: Akamai CDN, Imperva WAF, SSL/TLS management, API Gateway security

Release & Incident Mgmt: ServiceNow, PagerDuty, SLO/SLI/SLA definition, RCA, blameless post-mortems, on-call rotation

Programming: Python, Bash, JavaScript/React, FastAPI, Java, C#

Monitoring & Observability: Grafana, Prometheus, Datadog, New Relic, Splunk, CloudWatch, LangSmith

PROFESSIONAL EXPERIENCE

Unosquare / McGraw-Hill Education (MHE) — Senior Cloud Engineer / SRE

Oct 2025 – Present | Remote

- Architected and deployed a production generative AI platform on EKS integrating AWS Bedrock as multi-model LLM provider (Claude, Titan), serving 500+ internal users for AI-assisted workflows
- Built agentic infrastructure using LibreChat with custom tool integrations, backed by Redis for session/context persistence and PostgreSQL for conversation history and audit logging
- Designed and packaged MCP (Model Context Protocol) gateway as a Helm chart, enabling standardized tool-calling interfaces between LLM agents and internal services
- Managed 4 EKS clusters (Kubernetes 1.32) across nonprod, staging, and production using Terraform/Terragrunt and Helm; maintained 99.9% uptime SLO
- Participated in P1/P2 on-call rotations and led root cause analysis and post-incident reviews; defined and monitored SLOs/SLIs for critical enterprise applications
- Built and maintained observability dashboards using Datadog, New Relic, Grafana, and Prometheus; managed infrastructure via GitOps with ArgoCD and GitHub Actions

Coatl Tech — Cloud & ML Consulting Engineer

Aug 2024 – Oct 2025 | Remote

- Delivered cloud solutions to clients including requirements gathering, architecture design, and implementation on AWS and GCP
- Built modular GitLab CI/CD pipelines for multi-cloud deployments, reducing client deployment time by 40%

- Designed and automated end-to-end ML pipelines on GCP Vertex AI using Terraform — covering data ingestion from BigQuery/Cloud Storage, model training orchestration, and production deployment with monitoring
- Developed full-stack applications using React/Vite frontend with FastAPI (Python) and Java Spring backends

T-Mobile — Senior Associate Cloud Engineer (SRE)

Sep 2022 – Aug 2024 | Remote (CDMX)

- Managed domain and CDN configurations for high-traffic consumer websites (30M+ monthly visitors) using Akamai and Imperva WAF
- Automated Akamai property provisioning using Terraform and GitLab CI/CD pipelines, reducing configuration drift and deployment errors by 60%
- Implemented security policies and SSL/TLS certificate lifecycle management for 200+ enterprise web applications
- Participated in 24/7 on-call rotations; troubleshoot P1/P2 incidents with structured root cause analysis
- Led knowledge transfer sessions during team transitions for domain management processes

Circulo de Credito — Senior DevOps Engineer

Feb 2022 – Aug 2022

- Migrated critical APIs from Apigee Edge to Apigee X and AWS API Gateway, improving availability by 25%
- Automated deployment pipelines with GitLab CI/CD and AWS CodeDeploy; set up centralized monitoring with Grafana, Slack alerts, and PagerDuty

Televisa Blim TV — Senior DevOps Engineer

May 2019 – Feb 2022

- Administered cloud infrastructure for Blim TV's streaming platform on AWS (EC2, ECS, AWS Elemental), serving 2M+ subscribers
- Managed Wowza streaming servers (Java) for live and on-demand video delivery; improved CI/CD workflows using Jenkins

Grupo Jaque / Jaque Digital — Co-Founder & CTO / Solutions Architect

2013 – 2018 | Mexico City, Tijuana & Bogota (Colombia)

- Co-founded and grew a technology consultancy delivering custom enterprise solutions across government, transportation, financial services, and technology sectors
- Led end-to-end customer engagements: on-site discovery, solution architecture, development, delivery, training, and post-launch support
- NEC / AFOREs: Delivered biometric fingerprint reader integration for retirement fund administrators
- CAPUFE: Designed QR code generation system for toll payment receipts, integrating with government payment infrastructure
- Transportation (Baja California): Led on-site trips to Tijuana for discovery and design of integrated bus management platform
- Carvajal Tecnologia y Servicios (Bogota, Colombia): Traveled to Colombia to lead electronic invoicing projects, managing cross-border client relationships
- Grew company revenue by 50% through improved solution design and customer satisfaction

IIMAS, UNAM — GIS Specialist & DevOps Engineer

2018 – 2019

- Developed GIS modules in C# and administered GeoServer/JBoss infrastructure; managed PostgreSQL/PostGIS databases for spatial data

Previous: Java EE Engineer — SHCP (1.5 years) | Interconnection Analyst — Telefonica Movistar

PROJECTS

AI Code Review Agent

Agentic system built with LangGraph + FastAPI + FAISS that performs automated code reviews on PR diffs. Integrates real tool calling (ruff linter, test coverage), RAG over repo conventions, dynamic context trimming, and structured JSON logging. Deployed via Docker Compose with GitHub Actions CI/CD pipeline.

Stack: Python, LangGraph, FastAPI, FAISS, Docker, GitHub Actions

EDUCATION

B.Sc. in Computer Sciences

National Autonomous University of Mexico (UNAM)

CERTIFICATIONS & TRAINING

DeepLearning.AI — LangChain for LLM Application Development

ITIL Methodologies | Scrum Implementation

LANGUAGES

Spanish: Native | English: Professional proficiency (daily use with international teams) | German: Intermediate
